

Neo

Crop

Spinach

Market Segment

Babyleaf

Hybrid

Yes

Disease Resistance

High Resistance: Pe: 1-12,14-16,18-19

Features

- Uniform spinach for warm shoulder harvest
- Thick, oval-shaped leaves
- Extremely upright growth habit for easy harvest
- Strong tolerance to Pythium under heavy stress

Description

NEO is a high yielding, extremely uniform spinach for the warm shoulder harvest season with an even, constant vigour. NEO develops very thick, oval-shaped leaves which have an extremely upright habit allowing for ease of harvest. The leaves have an attractive, medium savoy that gives texture in the bag and results in high yields. As nights get cooler in autumn, this savoy becomes even more pronounced. NEO shows strong tolerance to yellowing in periods of unseasonable rain and has strong tolerance to Pythium in periods of heavy stress. Neo has resistance to Downy Mildew (Pe).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
