

Omeris

Crop

Cauliflower

Market Segment

Fresh market, processing

Hybrid

Yes

Features

- Slow maturing, cool season variety for southern areas
- Excellent uniformity with well wrapped, white curds
- Dome-shaped with nice tuck

Description

OMERIS is a cool season variety mainly suited to southern areas for winter and early spring production. OMERIS is slow maturing; around 16 weeks from transplant and produces well wrapped heavy white curds with a domed shape and nice tuck. OMERIS' frame is upright and vigorous, and this variety has shown excellent uniformity in size and maturity in plantings to date.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
