

Panama

Crop

Cucumber

Market Segment

Greenhouse Lebanese

Hybrid

Yes

Disease Resistance

High Resistance: Cca, Ccu

Intermediate Resistance: CMV, CVYV, Px

Features

- Semi-multi fruited
- 16-18cm average fruit length
- Dark green colour
- Excellent uniformity
- Compact but vigorous plant
- Widely adaptable
- Suits spring, summer and early autumn harvest

Description

PANAMA is a semi-multi fruited vigorous Lebanese cucumber variety. Best suited to spring, summer and early autumn harvest, PANAMA is a highly productive hybrid, easy to grow with consistent reliable performance and very regular fruit shape. The vigorous plant gives short generative side shoots and has a strong root system. PANAMA is highly appreciated for its outstanding quality and uniformity.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
