

# Pendlebury

## Crop

Lettuce

## Market Segment

Multileaf - Green

## Hybrid

No

## Disease Resistance

High Resistance: Bl:16-29,31-33

## Features

- Green Coral with white internal
- Low core and fine leaf attachment
- High yielding and uniform
- Crisp leaf texture
- Year-round production

## Description

PENDLEBURY is a Coral variety with a fine, crisp green leaf and white internal colour. The medium to large heads are uniform with a low core and have shown very good bolting and tipburn tolerance in plantings to date. PENDLEBURY is high yielding with a uniform, spikey leaf and fine attachment. It has resistance to Downy Mildew (Bl).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
