Features

- High yielding semi-multi baby snack
- Average 9cm in length
- Shiny light green colour
- Excellent flavour and shelf life

Description

POCO is a high quality semi-multi variety for the baby snacking cucumber market. The moderately strong plant is early to harvest with short internode spacing and excellent yield potential. Harvested at approx. 9cm in length, the fruit have very good uniformity with shiny light green colour and excellent flavour and shelf life. POCO has intermediate resistance to Powdery Mildew, showing good tolerance alongside standards in plantings to date. POCO is an excellent option for speciality cucumber growers wanting flavour and quality. Suggested for planting in the spring, summer and early autumn period.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
