

# Portsea

## Crop

Spinach

## Market Segment

Babyleaf

## Hybrid

Yes

## Disease Resistance

High Resistance: Pe:1-12, 14-16,19

## Features

- Babyleaf variety
- Thick, dark green leaf with very good uniformity
- Semi-erect habit with slightly cupped leaf
- Mid-late maturity
- High yielding

## Description

PORTSEA is a uniform, semi-erect spinach for babyleaf. It has a thick, dark green, oval-shaped leaf which is slightly cupped. PORTSEA is a cool season variety, performing best in autumn and late spring (Vic) and cooler seasons in Qld. It is mid-late maturing with good uniformity. PORTSEA is a high yielding variety and has resistance to Downy Mildew (Pe).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. NOVEMBER 2021. ACN 002 887 256
