

Reko

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Cucumber

Market Segment

Greenhouse Continental

Hybrid

Yes

Disease Resistance

High Resistance: Cca, Ccu

Features

- Very early maturity
- Dark green glossy fruit
- Strong cool weather tolerance
- Versatile performer
- Highly productive

Description

REKO is a very early and productive variety producing very dark green medium long shiny fruit with a slight rib. The fruit are approx. 32-36cm in length. REKO has a vigorous growing habit with strong cool weather tolerance and strong recuperative powers. Good resistance to Target Spot and Scab. Recommended for cool season production, this versatile variety has an extended production slot in many areas.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
