

Riyad

Crop

Cucumber

Market Segment

Greenhouse Lebanese

Hybrid

Yes

Disease Resistance

High Resistance: CMV

Intermediate Resistance: Px, Pcu

Features

- Multi fruited type for warm season harvest
- Open plant habit with high yield potential
- Uniform fruit shape and length
- Good fruit quality and shelf life

Description

RIYAD is a multi-fruited variety for late spring, summer and early autumn harvest, with a strong but open habit with short internodes. RIYAD is a high yielding variety with good fruit quality and shelf life and has performed well under both substrate and soil systems. The fruit are approx. 16-18cm in length with an attractive mid green colour, uniform cylindrical shape and light rib. RIYAD has resistances to Cucumber Mosaic Virus (CMV), Powdery Mildew (Px) and Downy Mildew (Pcu).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. AUGUST 2023. ACN 002 887 256
