

Royalstar

Crop

Tomato

Market Segment

Coloured Cherry

Hybrid

Yes

Disease Resistance

High Resistance: Fol:0, ToMV:0-1, Pf:1-5

Intermediate Resistance: N:(Mi), Ss

Features

- Bright orange cherry with good flavour
- Firm fruit approx. 15g AFW
- Compact plant with good setting ability
- Approx. 12 fruit per truss
- Very good cracking tolerance
- For loose pick or cluster harvest

Description

ROYALSTAR is a bright orange cherry variety which is suitable for loose pick or cluster harvesting with an average fruit weight of 15 grams. The compact plant produces firm uniform fruit with yields of approximately 12 fruit per truss. ROYALSTAR has shown very good setting ability with good tolerance to splitting/cracking in trial plantings to date. It has resistance to Fusarium Wilt (Fol), Leaf Mould (Pf), Tomato Mosaic Virus (ToMV) Nematode (Mi) and Gray Leaf Spot (Ss).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
