

Sandor

Crop

Pumpkin

Market Segment

Fresh market and processing

Hybrid

Yes

Features

- Hybrid Butternut with large fruit size
- Strong plant, good yields
- Dark orange flesh colour

Description

SANDOR is a hybrid Butternut with larger fruit size than Sunset. SANDOR has excellent plant vigour resulting in better fruit coverage from the effects of the sun. SANDOR has shown less susceptibility to Downy Mildew, virus and fruit etch than many competing varieties. Yields are consistently high and pack-out rates of first class fruit put SANDOR on a new level. Flesh is solid with a very dark orange colour. An extremely versatile variety that can be used for both fresh market and processing.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
