

Shakarlis

Crop

Cauliflower

Hybrid

Yes

Disease Resistance

Intermediate Resistance: Xcc

Features

- Early maturing (80-85 days)
- Autumn harvest
- Medium to large frame
- Smooth, white curd
- Well covered and uniform heads
- Good disease tolerance
- Uniform maturity

Description

SHAKARIS is an early maturing (80-85 days) autumn variety with a medium to large frame and heavy, smooth white curds. The domed heads are well covered and very uniform in maturity. SHAKARIS has shown very good tolerance to disease in plantings to date and has intermediate resistance to Black Rot (Xcc).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
