

Snowball

Crop

Lettuce

Market Segment

Iceberg

Disease Resistance

High Resistance: Bl: 16-37

Hybrid

No

Features

- Late maturing Iceberg
- Cool season production
- Mid-dark green, dense round heads
- Excellent tipburn tolerance
- Strong vigour
- Good uniformity

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

Description

SNOWBALL is a later maturing, uniform and vigorous Iceberg variety for cold season production. It has shown excellent tipburn and frost tolerance in our commercial trials to date, with medium to large frame and heads. SNOWBALL is a mid to dark green colour with medium blistered leaf, attractive, uniform round heads and an average weight of 680 grams. SNOWBALL has resistance to Downy Mildew (Bl).

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. FEBRUARY 2022. ACN 002 887 256
