

Sol

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Celery

Market Segment

Fresh Market

Hybrid

Yes

Features

- Heavy and straight
- Green, medium-ribbed stalks
- Low core
- Tipburn tolerance
- Good uniformity

Description

SOL produces a very attractive glossy green, medium-ribbed stalk with an excellent weight and low core. It has shown good tipburn tolerance in plantings to date and has good uniformity. SOL is mid maturing with good size and suits harvesting from summer through to end of autumn in southern areas and for autumn and winter harvest in Queensland.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
