

Sorrento

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Spinach

Market Segment

Babyleaf

Hybrid

Yes

Disease Resistance

High Resistance: Pe:1-11,15,16 (12,14 IR)

Features

- Dark green babyleaf spinach
- Thick, spade-shaped, smooth leaf
- Upright and uniform growth
- Warm season, slow growing variety

Description

SORRENTO is a very dark green babyleaf spinach for warm season production. It has a lush, upright growth habit with uniform and thick spade-shaped leaves. SORRENTO is a slower growing variety reaching maturity approx. 25-30 days from direct sowing, and has resistance to Downy Mildew (Pe).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. **SEPTEMBER 2020.** ACN 002 887 256
