Yes

Disease Resistance

Intermediate Resistance: Vd, Fol:1,2(US), ToMV

Features

- Large fruited LSL type
- Deep oblate shape
- Excellent uniformity
- Good weather tolerance
- Proven performer for SEQld regions

Description

THUNDER is a indeterminate LSL jointed variety with larger size. Produces attractive medium to large sized, deep oblate fruit with excellent uniformity, good flavour and firmness. The fruit have a uniform green shoulder, tidy stem and blossom ends with good internal quality and tolerance to hollowing. THUNDER has shown good weather tolerance under difficult spring conditions and offers good overall yields and excellent quality. A proven performer, THUNDER has been a major selling variety in south east Qld and Granite Belt regions for many years.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. SEPTEMBER 2020. ACN 002 887 256
