

# Wildcat

**SOUTH PACIFIC SEEDS**  
SINCE 1986

## Crop

Watermelon

## Market Segment

Diploid All Sweet

## Hybrid

Yes

## Hybrid

Intermediate Resistance: Co:1, Fon:1

## Features

- Medium sized diploid All Sweet type
- High quality, deep red, crisp internal flesh
- Low seed content
- Thick rind and sweet flavour
- Excellent uniformity and high yield potential

## Description

This mid maturing seeded All Sweet type produces high yields of medium sized blocky oblong melons with excellent uniformity. High quality internal flesh is a feature of this variety with very crisp deep red flesh, and low seed content, thick rind and sweet flavour. Average size is approx 32-36cm x 22-25cm - varying with conditions. Seed of WILDCAT is similar in size to most seedless varieties, and as such can be direct seeded with ease, in combination with the preferred seedless variety. The seed size also contributes strong emergence and vigour to the seedling, a benefit for both seedling nurseries and growers that direct seed.

*For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.*

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. **SEPTEMBER 2020.** ACN 002 887 256
