

Wildling

Crop

Lettuce

Market Segment

Multileaf Green

Hybrid

No

Disease Resistance

High Resistance: 16-29,31-33

Features

- Light green Coral
- Pale green to white internal
- Crisp leaf texture
- Medium to large size heads
- Good tipburn tolerance

Description

WILDLING is a mid to light green Coral variety with a pale green to white internal colour for year-round production. The heads are large and produce a high yield of good-sized spikey leaves for salad mixes. WILDLING leaf has a crisp texture and is broad at the top with a fine attachment. It has resistance to Downy Mildew (Bl) and has shown good bolting and tipburn tolerance in plantings to date.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
