

Zesty

Crop

Tomato

Market Segment

Grape - Coloured

Hybrid

Yes

Disease Resistance

Intermediate Resistance: ToMV, Pf:1-5, S

Features

- Indeterminate speciality grape
- Glossy bright yellow teardrop fruit
- Large size 15-25g
- Early maturity
- Multi branching with high yield potential
- Suit punnet packs

Description

ZESTY is an early maturing indeterminate yellow grape tomato for speciality market growers. The plant has good vigour with an open plant habit and multi-branched cluster formation. ZESTY produces high yields of firm glossy jointed fruit with teardrop shape and bright yellow colour. The variety offers very good uniformity and good flavour for a yellow fruit type. The fruit are attractive with large size approx. 15-25g and are best suited for single pick for punnet pack production.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
