The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. VALID FOR 12 MONTHS FROM JANUARY 2020. ACN 002 887 256

### Kameron (Full Size Drumhead) (Intermediate Resistance: Xcc, Foc)

KAMERON is a proven performer throughout Australia, offering a highly uniform product with a good large frame and excellent holding for main season production. It produces a large, flat, globe-shaped head at maturity and has low levels of off-types, which helps to ensure maximum field cut. KAMERON is approx. 100-120 days to maturity from transplant and has resistance to Black Rot (Xcc) and Fusarium Yellows (Foc).

### Asia (Mid Size Drumhead)

ASIA is a medium size cabbage (2-3 kg class) with an attractive green colour and sweet flavour. ASIA offers a very uniform head size with a good outer frame and flat globe shape. The low core enables the variety to be used in bolting periods with some success. ASIA is suitable for processing or fresh market use. Approx. 120 days from transplant in winter.

### Savoy Hotel (Savoy) (Intermediate Resistance: Xcc, Foc)

SAVOY HOTEL is a semi-globe, slow bolting Savoy cabbage with vigorous growth and an upright outer leaf for winter/shoulder harvest. It is a mid-maturing variety which is very uniform and has a dark blue-green frame and head colour, with a yellow internal and a heavily blistered leaf. SAVOY HOTEL has resistance to Black Rot (Xcc) and Fusarium Yellows (Foc).

### Savoy King (Savoy)

The standard for many years, SAVOY KING is a medium size, globe-shaped Savoy cabbage with a blue-green coloured dense head, uniform maturity and a heavily blistered leaf. SAVOY KING is not recommended for summer production in some regions. Check with your local SPS representative.

### Red Jewel (Mid Size Red) (Intermediate Resistance: Xcc)

RED JEWEL is a medium size globe-shaped, red cabbage with an upright habit and dense heads. RED JEWEL has excellent uniformity, an attractive dark red colour and nice flavour. It has resistance to Black Rot (Xcc).

### 011-7 (Full Size Red)

011-7 is an attractive red cabbage with a large upright frame and dense, globe-shaped heads. 011-7 is very uniform with an excellent internal, good size and colour, and good holding ability.
