ADVENTURE

ADVENTURE is a versatile variety with a 14-16 week maturity. The strong upright frame produces well covered smooth white curds. ADVENTURE is recommended for harvesting in winter/early spring in Qld and spring/early summer in cooler production areas of WA.

BORIS

BORIS is a versatile and self-covering cauliflower with 11-12 weeks maturity for spring, mild summer and autumn harvest. BORIS has a medium to large frame offering good curd cover, with dome-shaped heads and excellent curd colour and quality.

DENLIS

DENLIS is a cool season variety in the Adventure/Brittany time slot with a 14-16 week maturity. DENLIS produces smooth, white, well wrapped curds on a strong upright plant. The tall frame sits well off the ground, and offers excellent curd cover.

GENESIS

GENESIS is a mid-maturing, uniform variety which produces smooth, white curds which are well covered in a dome-shaped head. GENESIS heads are an avg. weight of 1030g, sit within a medium size frame and have shown good uniformity of maturity and nil ricing in plantings to date. GENESIS suits warm season production in southern states and autumn/winter in south-east Queensland.

SHAKARIS

Intermediate Resistance: Xcc

SHAKARIS is an early maturing (80-85 days) autumn variety with a medium to large frame and heavy, smooth white curds. The domed heads are well covered and very uniform in maturity. SHAKARIS has shown very good tolerance to disease in plantings to date and has intermediate resistance to Black Rot (Xcc).
