ARIA

High Resistance: Bl: 16-27,29,32

ARIA is a cool season variety for spring harvest with large, dark green, round heads. It is early-mid maturing and has shown very good uniformity and tipburn tolerance in plantings to date. ARIA is sure heading with a medium-large frame, providing nice protection to the head. ARIA has also shown to have good bolting tolerance under variable spring conditions and has resistance to Downy Mildew (Bl).

KING

High Resistance: Bl: 16-24,27,28,30-32

KING is an early to mid-maturing variety with a medium-sized, round head and frame. It has a smooth leaf of mid green colour and also presents with a short core. KING suits autumn harvest in Vic and winter harvest in Qld for growers wanting a medium sized head. KING has shown good uniformity with tipburn and bolting tolerance in plantings to date, and has some Downy Mildew (Bl) resistance.

TURINO

High Resistance: Bl: 16,21,23,32

TURINO is a mid-maturing Iceberg with large dense heads and a large frame. It has excellent uniformity, displaying nice round, dark green heads and good tipburn tolerance. TURINO has a medium blistered leaf and is suited for winter production in Qld and early winter in WA, with some resistance to Downy Mildew (Bl).
