ARROW

ARROW is a green baby leaf Coral, more suited to warm season production. It has a thick and crispy leaf offering good shelf life, a fine leaf attachment and stands very upright for easy harvest. It has shown strong vigour, good uniformity and tipburn tolerance in plantings to date. ARROW has resistance to Downy Mildew (Bl).

WHITFIELD

WHITFIELD is a vibrant green Coral baby leaf variety for year-round production. It has a nice fine leaf attachment and great leaf incision with spikey tips. WHITFIELD is vigorous and high-yielding with very good uniformity of leaf and good volume for salad bags. It has shown good tolerance to tipburn in plantings to date and has Downy Mildew (Bl) resistance.

WINES

WINES is a vibrant deep red Coral with high gloss, suitable for year-round baby leaf production. The leaf has a fine attachment with excellent texture and volume, offering good shelf life and high yield. WINES has shown strong vigour, good uniformity and tipburn tolerance in plantings to date. WINES has resistance to Downy Mildew (Bl).

SABRINA

SABRINA is a deep, red-tipped Coral variety with a vibrant green internal, for year-round production. The leaf is lightly serrated/frilled and is of a good thickness and crispness, offering good shelf life. SABRINA has an upright growth habit and fine leaf attachment for easy harvest and offers very good uniformity and vigour. SABRINA has resistance to Downy Mildew (Bl).

CAESAREA

CAESAREA is a dark green Cos variety for year-round baby leaf production. The glossy leaf is slightly cupped and savoyed, with good thickness and a fine attachment. CAESAREA has an upright and tall growth habit with good uniformity and vigour, and has shown very good tolerance to tipburn in plantings to date. CAESAREA is high yielding and has resistance to Downy Mildew (Bl).

FORERUNNER

FORERUNNER is a vigorous, fast maturing, dark red baby leaf Cos lettuce variety for year-round production. The narrow leaf of FORERUNNER has good gloss, a fine stem attachment for easy harvest, and a medium thick texture. FORERUNNER has an upright growth habit with excellent uniformity, and has resistance to Downy Mildew (Bl).

STELLA

STELLA is a vigorous dark red Oak leaf variety for baby leaf production. STELLA's medium thick leaf is very lightly frilled and serrated, and goes from a triple red to a light green down to the fine stem attachment. STELLA has an upright growth habit, and produces a good yield of uniform and glossy, 3D curled leaves to give volume and colour for mixed bags. STELLA is suitable for year-round production with good Downy Mildew (Bl) resistance, and has shown good tipburn tolerance in plantings to date.

259-9
(trial)

Mid-dark green Oak with serrated margins. Upright, thick leaf. Still under assessment.
