GATSBY

**High Resistance:** Pe:1-12,14-16

GATSBY is a true warm season variety. It has a thick oval shaped leaf with a medium to heavy savoy. It's dark green in colour with a standout glossy sheen. GATSBY is high yielding and has resistance to Downy Mildew (Pe).

SORRENTO

**High Resistance:** Pe:1-11,15,16 (12,14 IR)

SORRENTO is a very dark green babyleaf spinach for warm season production. It has a lush, upright growth habit with uniform and thick spade-shaped leaves. SORRENTO is a slower growing variety reaching maturity approx. 25-30 days from direct sowing, and has resistance to Downy Mildew (Pe).

DIABLO

**High Resistance:** Pe:1-11,15 (12,14 IR)

DIABLO is a dark green, mid to late maturing spinach for babyleaf in autumn (cool harvest) and late spring. The leaf has a light savoy and slight pointed/round shape with good leaf strength and thickness. DIABLO has an upright growth habit with very good uniformity and has some resistance to Downy Mildew (Pe).

COUNTRYSIDE

**High Resistance:** Pe:1-12,14-16,19

COUNTRYSIDE is an attractive dark green babyleaf spinach for shoulder season production. It's easy-to-harvest due to its upright growth habit. COUNTRYSIDE leaf is flat with a slight cupping and is beautifully uniform with an oval shape. It has outstanding yield potential due its thick leaf. COUNTRYSIDE has some resistance to Downy Mildew (Pe).

LONGHORN

**High Resistance:** Pe:1-16,19 (17,18 IR)

LONGHORN is a vigorous, mid-dark green, high yielding spinach with a semi-erect, dense habit. LONGHORN suits production in spring and autumn and produces uniform, thick, lightly savoyed and cupped leaves, with a slightly pointed oval shape. LONGHORN has resistance to Downy Mildew (Pe).

JINX

**High Resistance:** Pe:1-10,15

JINX is a high yielding, dark green spinach suitable for cool season babyleaf production. The leaf is slightly cupped and savoyed with an oval shape, and an upright growth habit making it easy to harvest. The upright growth also assists air movement through the crop, enabling a healthy plant growth and high yield. JINX performs well during periods of high rainfall, maintaining it's dark green colour, and has some resistance to Downy Mildew (Pe).

BLACK GLOVE 10

**High Resistance:** Pe:1-11,15 (12-14) IR

BLACK GLOVE 10 is a dark green and slightly savoyed, vigorous growing spinach. It features an upright plant habit with low lying cotyledons and good uniformity, with even growth. Recommended for sowing in late autumn, winter and early spring, BLACK GLOVE 10 has Downy Mildew (Pe) resistance and is a market leader for the bunching market and suitable for babyleaf if cut early.

058-23 Bunching (Trial)

**High Resistance:** Pe:1-17

Stil in trial.  
Heavy, thick, dark green leaves. Fast growth.

ORIENT EXPRESS

**High Resistance:** Pe:1-11,15 (12,14 IR)

ORIENT EXPRESS is a vigorous growing spinach for the bunching market, with an attractive dark green, flat and pointed leaf shape. ORIENT EXPRESS has an erect growth habit, medium leaf thickness and is best suited to cool weather conditions. It has some resistance to Downy Mildew (Pe).
