TITUS

High Resistance: Bl:16-23,25,28

TITUS is a mid maturing, cool shoulder variety with good uniformity, and has shown good bolting tolerance in plantings to date. TITUS has a medium frame, medium-sized round heads and a short core, and has resistance to Downy Mildew (Bl).

KING

High Resistance: Bl:16-24,27,28,30-32

KING is an early to mid-maturing variety with a medium-sized, round head and frame. It has a smooth leaf of mid green colour and also presents with a short core. KING suits autumn harvest in Vic and winter harvest in Qld for growers wanting a medium sized head. KING has shown good uniformity with tipburn and bolting tolerance in plantings to date and has some Downy Mildew (Bl) resistance.

TURINO

High Resistance: Bl:16,21,23,32

TURINO is a mid-maturing Iceberg with large dense heads and a large frame. It has excellent uniformity, displaying nice round, dark green heads and good tipburn tolerance. TURINO has a medium blistered leaf and is suited for winter production in Qld and early winter in WA, with some resistance to Downy Mildew (Bl).

SNOWBALL

High Resistance: Bl:16-37

SNOWBALL is a later maturing, uniform and vigorous Iceberg variety for cold season production. It has shown excellent tipburn and frost tolerance in our commercial trials to date, with medium to large frame and heads. SNOWBALL is a mid to dark green colour with medium blistered leaf, attractive, uniform round heads and an average weight of 680 grams. SNOWBALL has resistance to Downy Mildew (Bl).

ARIA

High Resistance: Bl:16-27,29,32

ARIA is a cool season variety for spring with large, dark green, round heads. It is early-mid maturing and has shown very good uniformity and tipburn tolerance in plantings to date. ARIA is sure heading with a medium-large frame which holds to the head. ARIA has good bolting tolerance and has resistance to Downy Mildew (Bl).
